

Creative Problem Solving

1 day course

If you are often faced with problems and would like a systematical approach to deal with them - this course is for you.

The creative twist will also allow you to generate more creative 'out of the box solutions'. It's a great blend encouraging use of your logical left and your more creative right brain.

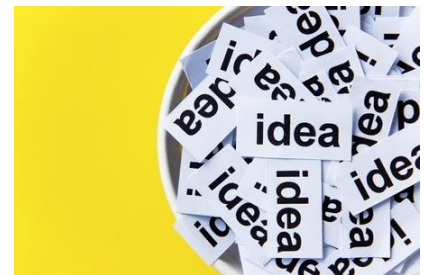

On the course you will be introduced to a 6 step problem solving process provides you a practical framework to approach a range of problems. The workshop promotes the use of both **analytical** and **creative thinking** so that you can develop innovative solutions.

You will be encouraged to challenge assumptions, reframe problems and consider a variety of perspectives. This workshop encourages a group problem solving approach so it's a great session for team building too!

Course Objectives

By the end of the course you will be able to:

- apply a 6 step problem solving technique
- use two problem analysis tools
- use a creative thinking technique to help you think 'outside the box'
- generate an action plan to implement the chosen solution to the problem
- develop a suitable monitoring and evaluation process
- confidently facilitate a problem solving session with your the team

This course is equally effective across private, public and the not for profit sectors. Apply the tools you've learned immediately. Problem solving will be so much easier and creative!

"I really enjoyed the session and it gave me a real, practical method to use with my team to assist in problem solving and generating new ideas"

"It has made me start thinking about addressing the traditional 'embedded' problems in the workplace in new ways."

Book this course for your team and use it to work on your current issues.
